

## AMC Infomediarities Inc. – Asset Reengineering

### AMC Infomediarities

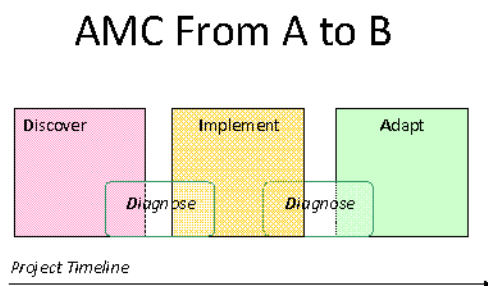

AMC is ready to help you plan, implement, adapt and support your enterprise management systems. Our special strength lies in asset reengineering – upgrading or installing systems to enhance productivity, performance and compliance.

Our goal is realignment – closing the gaps between the key asset in any enterprise, its people, and the systems they depend on for their daily work. The outcome is enhanced performance, sustainability and triple bottom line returns.

AMC specializes in complex, highly-regulated, capital-intensive environments and in virgin settings where there is no enterprise system at all.

### DAIS: The Journey from A to B

A successful asset reengineering process is a journey from A (current state) to B (future state). Success depends on clear objectives, leadership commitment and a common enterprise narrative.

The DAIS journey has 4 steps:

1. **D**iscovery
2. **A**cquisition
3. **I**mplementation
4. **S**upport and ROI

### Our Company

Founded in 2002, AMC is privately held.

### Our People

AMC is led by Mike Castronovo (President and CEO) and Dr. Julian Hilton (Chairman). Together they have over fifty years of experience in sectors such as public utilities, transportation, energy, healthcare and pharmaceuticals.

Our Director at Large, Dr. Malika Moussaid is a specialist of over twenty-five years standing in Academic and Student Affairs.
